The Veda Wars – Techno-warfare in the 21st ct.

White projects vs. black projects' science – Spiritual energies of the Aryan race

What we know so far – Tesla-towers and other advanced psychotronic weapon-systems

Developing defensive measures – A call to our allies in the resistance for support

The occult war and spiritual liberation

Abstract

“The world is governed by very different personages from what is imagined by those who are not behind the scenes (Benjamin Disraeli)”. In this essay, the Aryan elite of Denmark, Scandinavia and Germany, organized in The International Defense-force of Aryans (IDA), reveals the current occult, techno-war that in the wake of the Second World War is ravaging the world – the Third World War. The war is occult, for it is first and foremost a spiritual war, fought in regards to faith and epistemics. But the principalities of darkness have build psychotronic Tesla-weapons, targeting the divine Aryan race, attacking our spiritual energies. It is a “silent war with quiet weapons”. We explain how this is and the background for the current occult war that we seek to redeem in favor of all good people. We are not experts on physics, so the essay is also a call to our allies for support in resisting and defeating Skynet, which has engulfed and darkened the world for many years now. But we will take up the task of resisting this nefarious conspiracy, for what is going on in the world today is not to be accepted and has to be ended. The essay is a first step in bringing awareness to the true situation of the post-modern world. We hope the essay will be an inspiration for good people to contribute to the great cause.

Author's preface and ethical Note

This essay explores esoteric doctrines and speculative technologies from a spiritual, metaphysical, and philosophical perspective. It does not advocate violence, racial hatred, or political extremism in any form. All references to geopolitical entities, historical figures, and technological concepts are made within the framework of examining the metaphysical dimensions of the occult war as perceived through the doctrines and meditative insights of the Aryan Order.

Our concern lies not with temporal or material conflict, but with the ongoing spiritual struggle — the battle for truth, freedom of consciousness, and the defense of higher spiritual principles against forces of deception and oppression. The technological concepts discussed herein, including psychotronic weaponry and Tesla-based systems, are presented as part of a theoretical, spiritual worldview to inspire deeper reflection and investigation into the hidden dimensions of modern technological control systems.

The Veda Wars – Techno-warfare in the 21st ct.

Post-modernity is characterized by massive technological development and advances, where technology increasingly controls our lives. In 1976 Zbigniew Brzezinski published his book *Between Two Ages: America's Role in the Technetronic Era*. The global technetronic society would be ruled by an “from traditional values unconstrained elite”, furthering their agenda by “manipulating emotion and controlling reason” via technological means. But this is not just a question of Orwellian newspeak and double-think via the mass media and political propaganda (Orwell, 1948), which are also so prevalent in post-modernity and under the Neo-liberal/Marxist world order. Aldous Huxley's *Brave New World* (1932) also described a future society, where the citizens were controlled by mind control and hypnopaedia (learning by hearing while asleep or under hypnosis). No, what the Aryans have found is that this occult war on the minds of men, what we call “The Veda Wars”, also involves psychotronic weapon-systems, used to attack the spiritual energies and psyche of the holy Aryan race. As in Orwell and Huxley's dystopias, the post-modern world society is a surveillance-state and control-society, operating by psychological conditioning, as both Foucault (1975) and Deleuze (1990) have described, but in regards to resistance to the control-society, the jumping-point is the introduction of psychotronic weapons in the equation of power and resistance, especially in regards to the Aryan race. As in the film *Terminator*, interestingly, given our thesis, also from 1984, we are fighting not only against “flesh and blood”, but the the principalities of darkness in the form of an AI-controlled Skynet that is targeting the spiritual energies and psyche of the divine Aryan race. Some years ago, we discovered occult information, gathered from “the psychic ether”, a reality, which Colin Wilson (1971) has described as the only essential thesis of occultism, that the National-Socialists of Germany in the run-up to the Second World War discovered an international nefarious plot to attack the holy Aryan race with Tesla-technology – therefore the intensity of the war. Hitler often said, that we were fighting Satanism and what could be more satanic than attacking the spiritual energies and psyche of the Aryan race. Churchill was a member of The Hellfire Club, so it is not surprising to us that this was the true motive and cause of the Second World War. Now, in the aftermath of the Second World War, we are fighting a Third World War, as we have described in another paper (Riis-Søndergaard, 2024a). The conflict in this war, as with all wars in world history, is between an atheist/materialist worldview and view of man and a metaphysical/spiritual conception of man. The Aryans are on the right side of history in fighting atheism, materialism and Satanism, but the powers that be are actively suppressing the Aryan awakening and gathering by the use of psychotronic weapons. The Aryans are not that many, contrary to what the newspeak term Indo-European would imply – we estimate, that we are between 10.000 and 100.000 true Aryans worldwide, but we are the divine, heavenly race and we have a collective consciousness that we share with all ontological good people. It is therefore a Third World War between “the Aryan Christ consciousness” and the demonic hive-consciousness of the principalities of darkness – it is a cosmic war that has ravaged the world since the dawn of time. This is the true *telos* of world history and why we call the wars The Veda Wars, for they have been ongoing since we first incarnated into temporal existence from heavens. The Vedas are an aspect of the collective consciousness of the Aryan race of spirit and wisdom. When we interact with the Vedas, we find that world history has always moved towards this point of fighting Skynet in a final confrontation.

White projects vs. black projects' science – Spiritual energies of the Aryan race

In the later half of this life, Tesla spend all of his time researching the aether. Upon his death in 1943, in the midst of the Second World War, his work was confiscated and classified by the American intelligence-services. It is our thesis that his work on the aether has then seeped into black projects and given rise to whole new types of weapons, what we call psychotronic weapons, for these weapons target the spiritual energies, fx. the light-body/ethereal-body, the crown-chakra and pineal-gland-halo of the Aryan race, while they also interfere with the psyche/consciousness. It is an impossible task to attack the Aryan psyche, for we are a divine, transcendental race, so our hearts are in heavens, but nevertheless the principalities of darkness try just that. At least it is very uncomfortable for the Aryan race to have their light-bodies/souls attacked. But again, our hearts are in heavens, so we are “home safe”. The Aryan elite of Denmark, Scandinavia and Germany of today¹ has experienced these attacks on the light-body/crown-chakra and as we explain in the next section of the essay, we have ample evidence that this is what is going on. Therefore we have created Project Breakthrough, Research Institute for Spiritual Energies (RISE) and Spearhead Industries to further the research into the spiritual energies of the Aryan race and to build technology that can monitor our energies and thereby bring empirical evidence to what we have experience-based evidence for, for the knowledge of these energies is being suppressed in the Western world. Furthermore, we wish to invent and develop defensive measures to Tesla-weapons and other psychotronic weapon-systems. It is our mission to prove the spiritual energies of the Aryan race, a knowledge of which currently is kept in black projects, some among the enemies of the Aryan race, which have used this knowledge to develop weapons-systems to target the Aryan energies and psyche. “The truth is out there”, as Mulder would let you know in the famous TV-series *X-files*. We will discuss the defensive measures further into the text. It is exactly “the faculty X”, as Wilson described in the aforementioned book, the spiritual/mystical faculty of man, that is being actively suppressed in the Western world, as we described in the first section, and has been so since the advent of authoritarian and repressive Roman Christianity. All the traditional Aryan cultures had faith in the spiritual/mystical reality and therefore the knowledge of the spiritual energies of the Aryan race has been practically known since pre-historic times. But empirical evidence is lacking, or at least is kept in black projects. Frequently, the black projects are described to posses science 50 years in advance of public release – some of it may be kept classified longer, as fx. with the Tesla-science. But things are starting to get out (see fx. Vassilatos, 2000 for more in-depth on Tesla's science of the aether). The Aryans of today know we are an ethereal race, for we have discovered that first-hand, so we find that we must look towards Tesla-science of the aether to study and prove our spiritual energies and to build a defense against psychotronic weapons. In the next section of the paper, we will list what we currently know about the attacks. In the section following that, we will consider the prospect of building a defense to these weapons, before we end the essay by generally describing the occult war that is ravaging the world after the two World Wars, noting the ultimate goal of spiritual liberation. But the jumping point in our investigation seems to be Tesla's aether-science and the weaponization thereof.

¹ The Aryan elite, a young and vibrant generation, is gathered in The International Defense-force of Aryans (IDA), established in 2017 in Denmark. We seek to cast new light, transcendental illumination by transcendental meditation, on the Vedas, on Aryan theology, philosophy and science.

What we know so far – Tesla-towers and other advanced psychotronic weapon-systems

In this section of the paper, we will list what we know so far of the attacks that are being levied against the Aryan race. We know this from first-hand experience of being attacked and from transcendental meditation upon the timeless Vedas, which we collectively have carried out.

- They researched in brain-computer interfaces, ie. psychotronics.
- They build Tesla-towers worldwide, perhaps even in another sub-dimension to exist, which we are currently researching.
- Some of us have seen mini-Tesla-towers in visions and in breakthroughs.
- Already the National-Socialist regime of Germany discovered a nefarious conspiracy to attack the Aryan race with Tesla-technology in the run-up to the Second World War.
- We have indication that they may use a diverse set of technologies, not only Tesla-towers.
- They attempt to negate the Aryan spiritual energies.
- They attempt to infiltrate the collective Aryan Christ-consciousness.
- The deployment of Tesla-towers began in the 1980's.
- Russia refused to build Tesla-towers on their territory.
- We have occult information that Israel is behind the attacks and that the US has helped in spreading the Tesla-towers on the continent.
- We know that in the psychotronic warfare our enemies are obsessed with the question of faith, because they lack that dimension. They attack the faith of the Aryan race. The attack on the psyche of the Aryan race is therefore demonic, atheist and materialist.
- We know they use sophisticated quantum-computers, advanced AI and a form of telemetry.
- Given all these propositions, we know we are fighting Skynet.
- It is even our thesis that we are fighting a bio-techno-systemic, demonic hive of evil people.

We are currently researching, how this Tesla-technology operates. Is it by techno-electromagnetism or is it the more advanced aetheric-energies they attack? Most of us are not educated in physics and that is why the next section of the paper is also a call out to our allies, especially those who can contribute to the physics of these technologies that are being used, for support in developing defensive measures to these weapons, for we know they exist. When under attack from these weapon-systems, it feels like being zapped for energy – the light body. It renders the experience very gloomy and dire, for we lose our natural resistance to the dark forces in the occult war of fighting off black magic attacks and demonic interference. The light body is a natural shield and essential to the Aryan race, an ethereal race, so we take the attacks utmost serious. We will never tolerate attacks on any Aryans, but again, we are home safe, so they will never succeed in bringing down our race from the high-seat of heavens.

Developing defensive measures – A call to our allies in the resistance for support

In our research in Project Breakthrough, we have found that the scientific paradigm most suitable and likely to prove and explain our spiritual energies is the aetheric paradigm, which the Aryan Vedic and Greek cultures believed in, but which more recently also the famous scientist and inventor Nikola Tesla began research on. In the beginning of our investigation, we speculated that the weapons were a kind of techno-electromagnetic weapons, but now we speculate that there may be other technologies, other scientific paradigms in play, fx. the aetheric paradigm. According to our understanding, there exists, not especially a “luminiferous aether” that carries light, but more specifically a “psychic aether” that carries thoughts, intentions and emotions etc. – this we theorize is the habitat of the soul – the promised land – the true nature of spiritual man, which is being forcefully suppressed in the Western world. When the Aryans started to collectively meditate upon the aether, some years ago (fx. the Tibetan Buddhists, whom I visited previously, also carries out collective meditations on the aether), we also began to experience demonic attacks. In Vedic culture, the aether is known as “akasha” and the Greeks knew the aether as the fifth element (Blavatsky, 1877). This proves to us that existence is truly a spiritual, occult war between the forces of light and the forces of darkness, exactly how ancient Aryan cultures described reality in myths, though we don't consider black magic anything else than hallucinations and feverish visions, for the Aryan aether is what is true life and real. But when under attack from the pschyhotronic systems, it seems like our natural firewall against evil weakens, which opens up for demonic influence on the atmosphere and vibes – it is a very unpleasant feeling we seek to avoid. Therefore, we are interested in building defenses to these psychotronic attacks – this is the battlefield of the 21st ct. occult World War. The Aryans are on the right side of history, but we need the support of our allies in resisting the worldwide Skynet that has been build, targeting the Aryan race, especially the support of those experts in physics that can help in determining and monitoring the spiritual energies of the Aryan race and help build defenses to the psychotronic weapons that are being employed by the foes. It is the intersection of occult, spiritual war and advanced technology we are especially interested in investigating. For more on Project Breakthrough, Aryan spiritual energies and the paradigm-shift we propose, see (Riis-Søndergaard, 2024b). Efforts are underway in building defense to techno-electromagnetic weapons, fx. by heating the air with laser-technology, creating an effective shield against electromagnetic waves, but we wish to explore other paradigms as well, especially the aetheric paradigm, as we have mentioned. A paradigm-shift in science would make sense to fight for, since the current paradigm offers no solution to proving and explaining the marvelous spiritual energies of the Aryan race, which we have first-hand experience of. Instead, the spiritual energies, we know exist, are being actively denied and suppressed and called pseudo-science by mainstream academia – the Neo-liberal/Marxist atheist, materialist world order – but at the same time, we know that the science of our spiritual energies is known, though kept in classified black projects, for we are certain that we are under attack by such advanced weapons as would be possible to build with knowledge of the true scientific paradigm of energies. So it is an immense conspiracy and hypocrisy that captivates the world today – the powers that be fear the Aryan awakening and gathering, for they don't relate to heavens, so they do all they can to suppress the Aryan race, though in futility, for these are the latter days. What we fight for is a new ethereal Atlantis for all good people – a golden age.

The occult war and spiritual liberation

The motto for Project Breakthrough is taken from the Aryan *Rig-Veda* in a hymn to the goddess Ushas, goddess of the dawn: “Swiftly she drives away the darkness”. We chose that motto, for it reflects that today in Kali Yuga, the world is engulfed in a dark veil of secrecy, conspiracy and occult war – atheism and materialism. The Aryans fight for a new world, a spiritual world of light and illumination and therefore we refer to Ushas, goddess of the dawn, when we reflect upon our mission. We call our operation to resist the dystopian Skynet, Operation Thunderstorm, to reflect the anger of the Gods, the *Götterdämmerung*, as Wagner described, the twilight of the Gods, and the resolution to defeat those diabolic perpetrators of psychotronic warfare against us. One of our key propositions is that the war is an occult war, for it is fought in the shadows of regular geopolitics – if the knowledge of the science of the spiritual energies of the Aryan race and the occult techno-war that is being fought was known, it would burn the current powers-that-be down to the ashes and usher in a revolution in our understanding of creation as divine – it would be a New Age – a golden age, finally leaving Kali Yuga behind us. But the principalities of darkness thrive in the dark, so they do all they can to stay concealed and hidden from public view, scrutiny and criticism – these are the black projects that so rule post-modernity in the wake of the Second World War. What is going on in the world today is an advanced form of warfare, involving Tesla-tech and reminiscent of the two notorious CIA programs, Project Monarch and MK-Ultra – perhaps other psychotronic weapon-programs as well, but which also reflects the NSA-slogan “full spectrum dominance”. It is truly a brave new world, but the occult war is ancient. Now the dark forces have new weapons in their hands, the application of which the Aryan race and our allies try to counter and defeat. It is a serious task and we are at the forefront of 21st ct. warfare and defend the whole White Order, which is named after the blessed and holy day of heavens, for we have given an oath to combat evil and never tolerate evil. It is a musketeer-oath, for we will never accept aggression against any good people from the forces of darkness that today controls much of the world. But the resistance is yet strong – all over the world, we see an awakening to the spiritual, pure life, so we have imminent hope that we will soon be free from those psychotronic attacks that so haunt the Aryan race today. But for that to happen, we need good people to unite, for “what evil needs to prosper is for good people to do nothing”, as J.F. Kennedy stated. Kennedy (1961) also stated that we are fighting “a ruthless and monolithic conspiracy that primarily relies on covert means” and that “only few men dare speak about it” – this is the covert, occult Third World War. It is a spiritual, cosmic war and our ultimate goal is the spiritual liberation of all good people for the eternal life – the Holy Spirit. There is a myth of two ancient subterranean societies, Agartha and Shambala. In our understanding, but also that of Karl Haushofer, the German general and geographer, Agartha represents the Aryan race and the spiritual hierarchy of good people, while Shambala represents the evil hierarchy, up for world dominion and enslavement of mankind in the temporal, physical world. Agartha fights for the spiritual freedom and liberation. According to the myth, in the latter days, the forces of Agartha will rise to the surface and fight the remnants of the people of Shambala, liberating the world from thralldom and oppression. This is exactly what is happening today, when the Aryan elite steps forth to bring true illumination to all good people. This is why we write our essays, to inform mankind of the true origin and nature of spiritual man and to make mankind aware once again of the reality of the ancient, occult war.
