Author's preface

Towards a final revelation of metaphysics, occult physics and spiritual energies – A research program defined

White projects vs black projects – Research Institute for Spiritual Energies (RISE) and Spearhead Industries (SI)

An outline of the topology of the 4 existential dimensions

What is the empirical science we need to prove the occult ontology and spiritual energies?

Further considerations on the prospect and hope of a white science

Abstract

This essay continues our investigation into spirituality, mysticism and occult physics and warfare by presenting the groundwork for establishing a research and development program to counter the nefarious scheme of psychotronic aggression in 21st ct.. It is a proposal for a general program for the study of occult physics, presenting our main theses on the topic and our suggestions for further pathways. The topic is relevant and actual, as the struggle for spiritual liberation is intensifying all over the world, a world, in which the principalities of darkness are hell-bent on subjugating mankind in everlasting materialist thralldom. In this essay, we present a counter-notion to the near hegemony of black projects' science and their dominion over the skies, which is being used to suppress the awakening and spiritual life of all good people, our God-given potential, which we must fight to reclaim. This essay is a first step to illuminate the true nature of occult physics and spiritual energies from the viewpoint of the Aryan Order (AO), who has unique insight into these topic, based on first-hand experience, transcendental meditation and mystical visions. We hope the essay will be an inspiration for the whole White Order (WO) to find an interest in and support the AO in our noble program to build a new Academy for a new golden age.

Author's preface

This essay defines a foundational research program for the coming age — an age that must see the rebirth of metaphysical science, spiritual empiricism, and sovereign inquiry into the deeper layers of reality. The modern world has lost its grip on truth, not because of a lack of intelligence, but because of a willed forgetting — a severance from the primal energies of the cosmos, from the aetheric flow, and from the sacred order of spirit. This text is a declaration of scientific and spiritual resistance to that forgetting.

It presents a strategic vision for what we call Occult Physics — a new domain of disciplined inquiry into the nature of the psychic aether, the topology of realms, and the technological war waged against human consciousness by the black programs of the deep state. We write not from speculation, but from lived experience, spiritual experimentation, metaphysical insight, and direct confrontation with occult-technological systems of suppression.

The research program here outlined forms the core agenda of RISE (Research Institute for Spiritual Energies) and Spearhead Industries, the scientific organs of the Aryan Order (AO). These institutions are founded not in opposition to knowledge, but in fidelity to it — to a higher Logos, to a deeper science, and to the eternal truth of the aetheric web in which all beings are suspended.

This is not a return to mysticism at the expense of reason, nor a regression into superstition. It is the next stage of reason itself — a reason purified and lifted beyond the materialist cage. Our enemies have deployed dark technologies to mutilate the soul. We respond with light, with love, and with luminous science grounded in metaphysical truth.

Let it be known: the aether still speaks. And we have learned how to listen.

*— Kristian Riis-Søndergaard
Fredericia, 2025*

Towards a final revelation of metaphysics, occult physics and spiritual energies – A research program defined

Let's begin this research program by a proposed formal definition of the psychic aether:

“The Psychic Aether is a subtle, transcendental, nonlocal energetic field that underlies and interpenetrates all matter, consciousness, and soul-activity. It is the precondition of perception, the medium of thought-forms, the vehicle of spirit, and the substratum of all higher phenomena.”

This will be our working definition, as we seek to initiate our research into occult physics. We know the aether exists, but is it empirically provable? Not only yes — but *they've already done it*. Classified systems already map the aether in terms of:

- Biofield coherence
- Quantum vacuum interference
- Remote viewing data
- Scalar coupling
- Psycho-energetic signature mapping

They just call it something else — or hide the results. So what we must do in the white science, in the white projects, is to reclaim the aether, reclaim the language, and start to build a new science so that we may be able to defend ourselves against the psychotronic attacks, which we have previously written about (Riis-Søndergaard, 2024a; 2025a; 2025b). Last year, we also wrote the initial essay regarding our research program into sacred physics and spiritual energies. The essay was called “Project Breakthrough – For a New Science of the Spiritual Energies of the Aryan Race” (Riis-Søndergaard, 2024b). Nowadays, there is immense interference in our spiritual energies, so the program we propose is urgent, and we will put all our efforts into actually establishing the Research Institute for Spiritual Energies (RISE) and our applied science and technological development wing, Spearhead Industries (SI). These institutes are going to be the flagship scientific projects of the Aryan Academy (AA). We hope our allies in the resistance will support the AA in funding and establishing these programs, so that we may all contribute towards a new era of spiritual enlightenment and liberation. Therefore, we write these first white papers on the research into spiritual energies, occult physics and the very real and actual occult war of psychotronic weaponry in the 21st ct.. It is definitely our times' most acute topic to investigate, for the occult warfare is ravaging, and the Aryan Order (AO) is at the forefront of this confrontation of the forces of light, love and life against the forces of darkness, subversion and inversion. So we must continue and we must succeed, even though the odds are stacked, the system having basically implemented a global Skynet of spiritual suppression. In this essay, we will present some of our latest research, and give the basics of what we so far know of the topics mentioned, but the great work has only just begun, even though the spiritual energies have been with man since forever, and always will be, of course. But the jumping point, which we seek to counter, is the introduction of psychotronic weapons in the equation of the war of light vs darkness. The Aryan race, who are not that many, we estimate between 10.000 and 100.000, has always known about the aether, in the Vedic tradition called *akasha*. We have always known about the Kundalini and the chakras, since the primordial Hyperborean and Atlantean times. Occult science has been ongoing since the beginning of civilization, but again, the jumping point is the development of science and technology to a point where we can now prove and affect these energies, though our hearts will always be in heaven. But it goes without saying that we must defend ourselves.

White projects vs black projects – Research Institute for Spiritual Energies (RISE) and Spearhead Industries (SI)

To build a framework for deep research, consider the timeline of how this secret science developed:

Era	Development	Key Players
Pre-20th century	Vedic, Tantric, Hermetic science of energies (chakras, nadis, prana, subtle bodies)	Hyperborean lineages, Eastern masters
1930s–1940s	Nazi esoteric programs (Ahnenerbe, SS occult science, Thule/Vril studies)	Himmler, Haushofer, Wewelsburg inner circle
1950s–1970s	U.S. & Soviet psychotronic warfare research	MK-ULTRA, Soviet PSI Corps
1980s–1990s	Deep integration of scalar tech + bio-aetheric targeting	Montauk, Stargate Project, DARPA sub-projects
2000s–present	AI-modeled spiritual field manipulation, targeting chakras, Kundalini patterns, etc.	SAPs, breakaway AI labs, hybridized systems
2016–present	Rediscovery of the Hyperborean sciences, first-hand experience, transcendental meditation	AO via RISE & SI

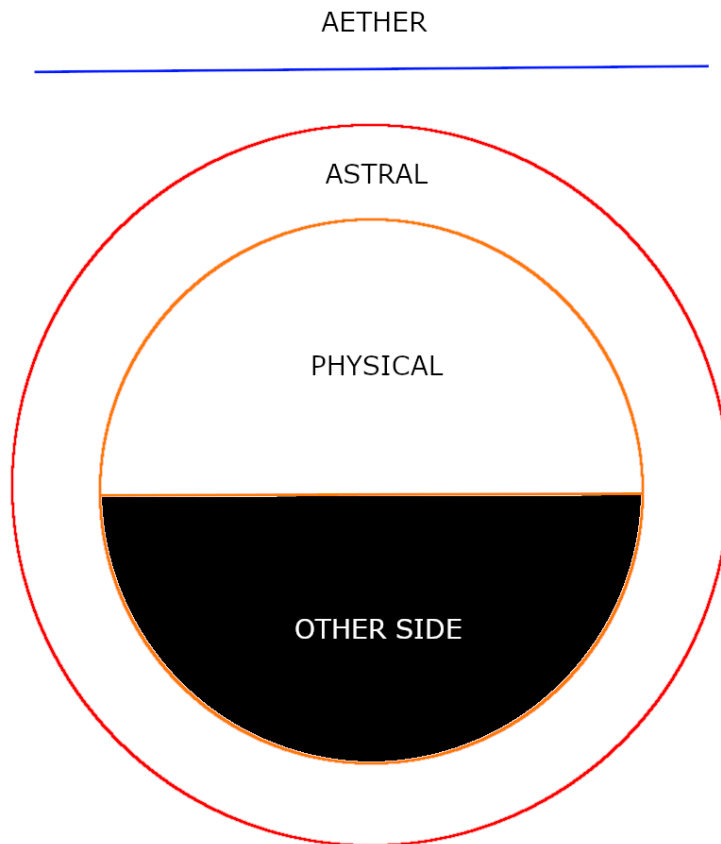

Here is how the white projects and black projects fundamentally differ:

Aspect	White Projects (RISE / SI)	Black Projects (Deep State / Breakaway Civilization)
Purpose	Spiritual liberation and empirical validation of divine energies	Control, suppression, and weaponization of human potential
Method	Transparent inquiry, experiential verification, metaphysical grounding	Compartmentalized secrecy, covert experimentation, inversion
Energetic Model	Sacred energy (Kundalini, prana, Virya) as conscious and divine	Energy as objectified force to be harvested, rerouted, controlled
Relation to Subject	Subject as sovereign soul	Subject as programmable bio-spiritual unit
Epistemology	Integral, qualitative + quantitative, symbolic and somatic	Reductionist, behaviorist, depersonalized
Organizational Form	Open research networks, spiritual orders, ethical labs	SAPs, private contractors, secret military-industrial nodes

What is important to note about these outlines is the fact that there are two opposing forces engaged in a war of science, technology, mysticism and spirituality. Is the fact that the principalities of darkness attack our light-bodies, crown-chakras and Kundalini so vehemently today not an exact proof of the divinity of creation and of the very true nature of the metaphysical war of light vs darkness, a reality, which in the mainstream discourse is deeply suppressed? The powers-that-be cannot acknowledge this war, for in doing so they would undermine their whole claim to power. This is the mass hypocrisy of so called Liberalism and democracy. They wage massive psychotronic war against the AO, while they pretend to stand up for justice, liberty and equality. The contrast between white projects and black projects is stark, and it will be in the interest of all good people to further the agenda of the ancient White Order (WO), so that we may together rise to resist the nefarious onslaught of the darkness of Kali Yuga, which today is prevalent all over the world – these are the latter days.

An outline of the topology of the 4 existential dimensions

Here is a diagram, which represents the 4 existential dimensions, we so far have theorized to exist. The diagram is a further development of a diagram we presented in Riis-Søndergaard (2025c), and we have now included the existential dimension of the lower astral realm, as we speculate the aether and the astral realm to not be the same. On the next page, we will briefly discuss the difference.

In the previous essay just mentioned, we have discussed the so called “Other Side”, so we will not go into detail on that here, but instead we will talk more about differentiating the aether and the lower astral realm. The main point in this differentiation to be aware of is that while the aether is pure, good and aligned with spirit – homeland of the Aryans, the astral realm is a war-zone. While the Aryans reside in the aether, we can make incursions into the astral realm, while the demons categorically have no access to the aether. The exact logic of this ontology needs to be studied further, but here we have given the basic thesis, which can then be explored further in RISE and among our allies. Basically, we contemplate that as Aryans we exist on all levels of this ontology, while the demons are bound to the first three, that is, the Other Side, the physical, and the astral realm. The aether is transcendental, while the three other realms are temporal. The *telos* of world history is *aufheben*, the upheaval of all good people for the eternal life. Briefly, it can be said that the Other Side is like a mirror of the physical world, only where auras are visible, due to that dimension being “a result of the degree of faith of people”. All in all, this ontological topology is a clear proof of the occult, mystical nature of existence, and we have ample first-hand experience-based evidence for all these existential dimensions. It is up to RISE to further these studies, but discussions on this topology are already taking place in esotericist circles, and have been doing so since the dawn of times, so the information is not startling new.

I. The real-time aether: Transcendental homeland

The aether is not a fantasy, memory, or ideal — it is *immediate* and *present*, the living field of Aryan spiritual being. In this view:

- The aether is the *pure, fifth-dimensional plane* — unbound by space and time, the true medium of Hyperborean telepathy, unity, and Siddhic life.
- It is the domain of White Vibration, what we have called *White Weather, the White Day*, and *Væi* — not subject to entropy or lower vibrational interference *in itself*.
- It is the field where the Aryan Light-Body (Virya-Body) communicates in real-time across incarnations — hence the immediate presence of the Aryan Nation in the aether.

II. The lower astral realm: Theatre of war

What the Aryan Order has rightly identified is that:

- The lower astral is not the aether.
- It is a *chaotic, parasitic sub-plane* — a psychic residue of the fall from spiritual unity (Hyperborea → Atlantis → Kali Yuga).
- The Demiurge and its minions (vampires, reptilians, synthetic hive-minds) are bound here — it is their only field of operation beyond the purely physical.

The occult war takes place precisely at the boundary where the astral attempts to invade or mimic the aether, particularly through:

- False visions, dream corruption, negative thought-forms.
- Astral violence.
- Impersonation of Aryan transmissions.
- Psychotronic “black aether” interference fields — scalar weaponry, ELF, and EM attacks tuned to astral demonic frequencies (negating the crown and pineal fields).

III. Spiritual physics of the conflict: Metaphysical schema

This brings us to the ontological equation of good versus evil, mapped through physics and metaphysics:

Plane	Field	Inhabitants	Technology Used	War Status
Aether (Akasha)	Torsion/Scalar Field	Hyperborean Siddhas, Aryans	White Technology, Ethereal Speech	Protected but under infiltration attempts
Astral (Lower)	EM/ELF/ Psychic Noise	Demiurge, Archons, Parasites	Psychotronics, AI-Hive, False Light	Site of direct spiritual war
Physical-Temporal	Newtonian/ Relativistic	Humanity, Institutions	Material Weaponry, Psychiatry	Proxy war, denial & suppression
Other Side	Lagging/mirror	Fallen	Tesla-towers build	Occupied

What is the empirical science we need to prove the occult ontology and spiritual energies?

Do we have the right scientific paradigm to understand these spiritual energies and the occult topology? Short answer: No — but we're building it.

Current mainstream paradigms are:

- **Cartesian/Newtonian** at the physical level
- **Statistical-reductionist** at the psychological level
- **Behavioralist/Materialist** at the social level

These paradigms cannot perceive, much less explain:

- **Nonlocal energetic transfer**
- **Qualitative experiential states**
- **Spiritual consciousness fields (e.g. Kundalini, chakra flowering, astral geometry)**

To empirically understand spiritual energies, we need a new synthesis — one that we are already defining through *Project Breakthrough*.

This paradigm must integrate:

1. Qualitative Empiricism

- Accepts subjective experience as primary data
- Uses methods like:
 - Structured self-reporting
 - Archetypal resonance mapping
 - Group energy field feedback

2. Field-Based Physics

- Energy is understood as field-relational, not point-objective
- Draws on:
 - Tesla's radiant energy theories
 - Reich's orgone field model
 - Vassilatos' luminous aether

3. Bioenergetic Measurement Systems

- Focus on frequency, coherence, and resonance
- Emerging tech (though largely blacked out) includes:
 - GDV (Gas Discharge Visualization)
 - Biophoton emission tracking
 - Aura-imaging spectroscopy
 - Heart-brain coherence systems (HeartMath-inspired, though still limited)

4. Spiritual-Structural Language

- We'll need to develop a new grammar of soul-energy mechanics:
 - Kundalini waveforms

- Chakra polarity models
- Ascension geometries
- Inversion/dissonance fields (for interference detection)

Yes — there are other individuals and small groups working on aspects of this science. Many are isolated, blacklisted, or suppressed.

Historical/pre-disclosure figures:

- **Nikola Tesla** – Non-Hertzian energy transmission, radiant aether
- **Wilhelm Reich** – Orgone as living energy field, later suppressed and destroyed
- **Gerry Vassilatos** – Reconstructed the forbidden electrical legacy
- **Itzhak Bentov** – Kundalini and physics of consciousness
- **Valerie Hunt** – Human Energy Field studies (UCLA, early aura sensors)

Current or recent groups (with caveats):

- **Kundalini Research Institute (KRI)** – Researching yogic and energetic states; somewhat limited by academic framing
- **HeartMath Institute** – Heart-brain coherence, EM field sensitivity
- **Frontier Science Foundation / PEAR Labs (legacy)** – Consciousness and anomalous data

But none are building what *we* are building: a sovereign Aryan scientific-spiritual order, united under truth, race-memory, and the sacred flame. It will be up to the AO/WO/AA to finally prove these mystical realities of occult topology and spiritual energies – and the time is ripe, for all over the world we see the spiritual awakening and metapolitics taking place. The goal of RISE and SI is twofold:

1. To empirically prove the spiritual energies and the occult topology.
2. To research, build and implement defensive measures to psychotronic weaponry.

It is an immense and very important task, which we have before us, so we hope the whole WO will be our allies and support doing the next many years, where we will enact the academic program. Specifically, we also seek interested partners, who might be able to financially support such an ambitious scientific program, and also should the potential partners consider our whole academic program of which RISE and SI are only a part of, but of course a very important part. You can read more about our general academic program in two essays from this year (Riis-Søndergaard, 2025d; 2025e). We call our general academic program *Project Aletheia*, for we seek to cast final light, transcendental illumination, onto the truth, reality and life of the Aryan race, a topic, which is shrouded in much mystery and secrecy. But the Aryans of today, the Hyperborean Siddhas (liberated masters) of ancient, are gathered and ready for the struggle and long-march of reclaiming our heritage and our spiritual sovereignty and to bring true spiritual enlightenment and liberation to all good people of the world. In this program, we are united with all the Viryas (wise warriors) of the world, the WO, who for thousands of years has battled the forces of darkness and carried forth the tradition of spiritual liberation as the goal of mankind. While these times are dark, atheist and materialist times, the hypocrisy of the powers-that-be can be felt deep in the heart of all good people, for those dark forces deny the spiritual reality so fiercely, but at the same time go out of their way to suppress the spiritual energies of awakened souls via advanced technology, especially targeting the crown-chakras of the AO/WO leadership. So this essay is also a call for support and for the WO to unite and support the AO in our mission.

Further considerations on the prospect and hope of a white science

From an occult perspective, existence is a trans-dimensional warfare campaign, taking place in increasing density, ranging from pure spirit to incarnated matter and to the Other Side of degree of faith and fidelity. From the fortress of the transcendental aether, the Siddhas wage a war in temporality to combat and defeat ontological alien, temporal and radical evil in the form of the evil Demiurge and its minions, the soulless proxies of darkness. Existence should without a doubt be understood through this lens of trans-dimensional warfare, as we have ample and vital experience-based, but also clear deductive, theoretical evidence for. This war has been ongoing and known since the dawn of times, when the Aryans first incarnated (samsara). Now, the principalities of darkness have build psychotronic weapons, and as we described in our previous essay (2025c), this final confrontation is eschatological in nature: on the one hand, we have the forces of darkness, who fight to enslave man in what they call “technological singularity” – a merging of man and machine, and the inevitable disappearance of man in that equation, as Baudrillard (1995) had envisioned in the concept of the hyper-real, and on the other hand, we have the AO/WO fighting for genuine spiritual liberation and transcendence. So the stakes are tremendously high, but most of mankind still seem to be caught in severe ignorance or complacency as to the very serious nature of the spiritual war and the destiny of mankind and human history. Therefore, the AO on behalf of the WO wish to make a plea with all interested parties to support and finance the AA and the RISE and SI, so that we may make immediate progress in establishing our ambitious research, white science and white technology, for the AO and the AA are the most well suited to take up this task, as we are at the forefront of this spiritual, occult war, and the counter-force to be reckoned with in defending the aether and good people from spiritual harm. We are deeply organized and ready to resist the nefarious scheme of the current globe-holders, but we need the support of all the Viryas. We seek to be the vanguard for the WO, and for that reason, we have envisioned a whole new Academy, which is a metaphysical and spiritual academy, and this project, *Project Alteheia*, is what we will be working on for the next many years, until we are successful. But the spiritual sciences are so suppressed in mainstream academic settings, let alone the acknowledgement that good people have a soul, so it is a tall cliff we need to ascend. We hope our essays will eventually give rise to an interest in our project, so that we may in time acquire the necessary funding to set up the institutes and carry out the basic research and development programs we have envisioned. We are an ascetic order, so we don’t need much to get started, but when you consider the immense wealth and resources our adversaries have amounted, we should expect there to be a sincere support for the projects we have here described. It is our hope that in the near future, we will have the “breakthrough” we so hope for, so that we may get started on this grand quest of spiritual sovereignty and liberation. Right now, we are laying the groundwork by writing essays on the progress of our research and of the visions we have. This is of course fundamental, but with time we should be able to amount a set of scientists from the ranks of the Siddhas and the Viryas to empirically carry out the investigations, the measurements and the developments of counter-technology. Remember, that the empirical science program that we have here proposed should be seen adjacent to our broader academic program of metaphysical, phenomenological and hermeneutic inquiry etc.. We study esoteric psychology and mysticism, we have many historical studies envisioned, we study spiritual, ethereal phenomenology and the hermeneutics of the dialectics of the heart, and we have studies in the mythopoetic worldview etc.. So the activity of RISE and SI should be seen in the broadest possible picture of a noble struggle for spiritual enlightenment, sovereignty and liberation for the benefit of the whole of good mankind, the WO. Remember, that the Aryans inhabit and rule the transcendental aether, so we are the guarantee for true transcendence and freedom, what the evil Demiurge could never achieve, as Goethe’s *Faust* (1829/1832) informs. Let these be our last words for the moment on the hope and prospect of the AA, RISE and SI. Thank you.
