Author's preface

The reality of psychotronic warfare in the 21st ct, and defining the threat

Who are the Aryans? – The Hyperborean Siddhas of the North

Initial proposal for a strategy in building a defense

Establishing the Research Institute for Spiritual Energies (RISE) and Project Spearhead Industries (PSI)

Future hope – Closing remarks on the prospect of the resistance

Abstract

“War never ends” – on the contrary, the (occult) war today has infringed upon the very essence of the soul, namely the psyche, collective consciousness, and spiritual energies of those who have been targeted by the ominous, psychotronic “Skynet”, developed and built after the Second World War.

The Hyperborean Siddhas, the authors of this “open letter to the scientific community”, are at the front of this subterranean war of Agartha (White Order) versus Shambala (Black Order).

By presenting this letter, we hope to gather allies in the resistance to the threat of psychotronic weapons, and we hope to initiate the building of defensive systems to these threats.

This open letter is a primer on the current efforts of the Hyperboreans to counter the deep-seated hatred on part of the principalities of darkness, who for ages have conspired to suppress the Hyperborean awakening and gathering, in these the latter days, accentuated by the intersection of occult warfare and technology.

Do not doubt that the Aryan Order is the defender of all spiritual sovereignty and decency in these dark times of the climax of Kali Yuga.

Let this letter reach out to the wider scientific community, so that we may together resist the oppression, and continue to build the “New Ethereal Atlantis” for the spiritual enlightenment and liberation of all the good of mankind.

Author's preface

Is this myth or reality? Is this metaphorical symbolism of the danger of technology, or is it a real-world fact of intense, spiritual warfare? Is this an esoteric warning to all spiritual leaders to unite in the resistance to known and proven weaponry, or is it a prophecy of future wars to come?

Will the scientists take heed of this call, or will they dismiss it as an unreal fear?

Can we deny that science has progressed to the point, where the technic control of the psyche is (near, but never ultimately) possible? In a mundane sense, via cultural manipulation, propaganda, media saturation etc., but in a more occult sense, via namely very real psychotronic weapons?

This essay seeks to establish an encounter between expert scientists of physics, and the spiritual leaders of Agartha (White Order).

This essay operates at the borderland of myth and the real, but are the effects of psychotronic weaponry not felt very intensely by those at the frontiers of the ancient, occult war today?

Heidegger (1954) warned against the threat of the uncontrolled science-technology complex. So did many other recent philosophers.

But what is the actual military-strategic situation today, in terms of the threats of the military-techno-industrial complex that Eisenhower (1961) warned against?

What is going on beneath our feet in the 21st ct. in the subterranean, Deep State Black Projects that few know about – even not the US president?

This essay seeks to answer these questions from the viewpoint of some of the most dedicated and sincere spiritual seekers of the modern world, namely the Hyperborean Siddhas.

This essay operates at the borderland between myth and reflection, employing symbolic and mythopoetic language to articulate ethical and spiritual anxieties surrounding the technological civilization of the 21st century. References to “psychotronic systems,” “hidden warfare,” or “spiritual conflict” should be understood as expressions of perceived existential threats rather than as empirically established claims. The text seeks not to accuse, but to awaken reflection on responsibility, restraint, and the dignity of the human spirit in an age of unprecedented technological power.

The reality of psychotronic warfare in the 21st ct, and defining the threat

The existence of psychotronic warfare is absolutely real, but still, the topic is clouded in much controversy, secrecy, disinformation, epistemic smog, and bad intent – but is this not the nature of any warfare – the fog of war?

Though, it's public knowledge that psychotronic weapons have been developed by especially USA and Russia since the Second World War.

But since the days of MK-ULTRA, Project Stargate, Project Montauk etc., the reality of these weapon-systems has gone deeply underground, presumably into the Black Projects of the Deep State, the USAPs (Unacknowledged Special Access Programs) that not even the US president has access to.

We know of the “Moscow Signal” against the US embassy in Moscow, and more recently we know of the “Havana Syndrome”, reported to have effected many US officials in Cuba.

Let's present this diagram of the development of psychotronic warfare as it has been developed in world history, especially as it links to the idea of “spiritual energies”, which is what we seek to explore in the Aryan Order (AO) via Research Institute for Spiritual Energies (RISE) and Project Spearhead Industries (PSI, formerly known as SI):

Era	Development	Key Players
Pre-20th century	Vedic, Tantric, Hermetic science of energies (chakras, nadis, prana, subtle bodies)	Hyperborean lineages, Eastern masters
1930s–1940s	Nazi esoteric programs (Ahnenerbe, SS occult science, Thule/Vril studies)	Himmler, Haushofer, Wewelsburg inner circle
1950s–1970s	U.S. & Soviet psychotronic warfare research	MK-ULTRA, Soviet PSI Corps
1980s–1990s	Deep integration of scalar tech + bio-aetheric targeting	Montauk, Stargate Project, DARPA sub-projects
2000s–present	AI-modeled spiritual field manipulation, targeting chakras, Kundalini patterns, etc.	SAPs, breakaway AI labs, hybridized systems
2016–present	Rediscovery of the Hyperborean sciences, first-hand experience, transcendental meditation	AO via RISE & PSI

Table 1: An overview of the development of psychotronic warfare. This table is reproduced from Riis-Søndergaard (2025a).

Given this diagram, we know that agencies have been very interested in the development of these types of weapons, so the question now is: how are they deployed today, and what is the state-of-the-art?

You can read more about our research into the reality and threat of psychotronic weapons in a range of our essays, which can all be found on the academia.edu page of the author¹, which is the official academic outreach of the AO. Here is an overview of current essays on the topic with links:

1. [Project Breakthrough – For a New Science of the Spiritual Energies of the Aryan Race \(2024a\).](#)
2. [Operation Thunderstorm – Resistance to Skynet \(2024b\).](#)
3. [Psionics and Psychotronic Warfare – Frontiers in the 21st Ct. Occult War \(2025b\).](#)
4. [Techno-Sorcery – Investigating the Intersection of Occult Warfare and Technology \(2025c\).](#)
5. [Occult Physics – A Research Program Defined \(2025a\).](#)
6. [Aryan Defense Research Program \(ADRP\) \(2025d\).](#)

Let's now continue by talking about who we are in the AO, and why we are at the frontier of the war.

Who are the Aryans? – The Hyperborean Siddhas of the North

Let's begin with some fundamental propositions as to who are the true Aryans, as opposed to the newspeak concept of the Indo-Europeans:

1. "Aryan" means "free, noble, pure, and elevated spirit".
2. We are a "spiritual race", and as such, not determined by mere biology, though we mostly incarnate among our Nordic/Germanic brothers and sisters.
3. We are a "lineage of Hyperborean Siddhas", "Hyperborean" meaning "beyond the Northern Wind", and "Siddha" in Sanskrit meaning "perfected, liberated master".
4. We incarnate from spirit and soul into the physical body, in Sanskrit "Samsara".
5. We estimate that the true Aryans are no more than between 10.000 and 100.000.
6. We stem from spirit, we are spirit-born, and as such, we primarily live our lives in the "transcendental, psychic aether" (Riis-Søndergaard, 2025e).
7. We possess the whole scale of "spiritual energies", including the Light-body, Vril, Kundalini and the Chakras.
8. We are a collective, so we dwell in the "collective consciousness" of the Aryan race (the aether) – a prime notion in Aryan race-mysticism and esoteric psychology, which is "transcendental meditation".
9. We are absolutely good, and our primary theological concept is the "primacy and dialectics of the heart".
10. But we have sworn an oath, the "White Vow", to "never tolerate evil, to combat and defeat evil, wherever it arises".

Let these propositions be an introduction to the nature and reality of the Aryan race, as it is properly understood by the Aryans/Siddhas themselves.

Furthermore, in our metaphysics, we consider the introduction of "temporal existence" (in Sanskrit "Maya") as due to the outbreak of "cosmic war" in the introduction of ontological alien evil, which is only temporary. So temporal existence is the "Valplads", the mystical battlefield, where Odin and the Valkyries choose their soldiers of valor and honor.

We consider the "esoteric Vedas" to be the foretelling of the cosmic war, and the mystical, poetic tale of the Aryan collective of the "triumph of the heart" – the Vedas foretold of these later wars against the ominous "Skynet".

Given these propositions, it is easy to see why the Aryan collective is at the front of the occult war of the 21st ct., as these days are the "latter days" – the "Aufheben" (Hegel, 1807; Riis-Søndergaard, 2022).

But for us, the war is primarily a question of "faith and epistemics". We do not condone violence, and we believe that the world should be conquered in the name of faith and truth, and not by force, coercion and violence. In this agenda, we are allied with all the Viryas (wise warriors) of the world.

We represent a program of "spiritual enlightenment and liberation", as all true, esoteric traditions have always proclaimed.

But then again, we absolutely believe in the "right to self-defense", to being free and independent in the "spiritual sovereignty of the soul" (in Greek "Psyche"), so we will never accept the psychotronic aggression against the AO leadership

Jumping point is that since our awakening and gathering in 2016-2017, we have been aware of the threat and aggression of psychotronic warfare, which today is very severe against our leadership.

Why would they attack the spiritual energies of the true Hyperborean Siddhas in such a vehement way?

Initial proposal for a strategy in building a defense

In the AO, we have set up a research and development program (R&D), consisting of RISE and PSI. Where RISE is theoretical science, PSI is applied science and tech-development. You can read more about these programs in the aforementioned essays. We will now outline our proposal for all of our allies to support the AO in our agenda to resist the so-called “Skynet”:

1. Make contact in the resistance, among spiritual leaders, scientific experts, and fundraisers.
2. Share intel on the state-of-the-art, mechanisms, and current deployments of psychotronic weapons.
3. Set up an Expert Advisory Panel (EAP) for RISE and PSI to initiate and further the R&D.
4. Research spiritual energies, as they have been outlined by AO – further theory, empirics and diagnostics.
5. Support the fundraising of The Hyperborean Initiative (HI) (Riis-Søndergaard, 2025f; 2025g), phase II of our Masterplan, so that we may acquire facilities, hire scientists and create the R&D programs.
6. Given research, make plans for defensive measure to be developed in PSI, urgently – diagnose attacks and build prototype defenses.
7. Disseminate information on the military-strategic situation and R&D activity of the resistance to Skynet among political, spiritual and academic leaders.

These are our propositions for furthering the resistance network and activity. We are building White Projects, as opposed to the nefarious Black Projects of the Deep State. Let’s compare:

Aspect	White Projects (RISE / PSI)	Black Projects (Deep State / Breakaway Civilization)
Purpose	Spiritual liberation and empirical validation of divine energies	Control, suppression, and weaponization of human potential
Method	Transparent inquiry, experiential verification, metaphysical grounding	Compartmentalized secrecy, covert experimentation, inversion
Energetic Model	Sacred energy (Kundalini, prana, Virya) as conscious and divine	Energy as objectified force to be harvested, rerouted, controlled
Relation to Subject	Subject as sovereign soul	Subject as programmable bio-spiritual unit
Epistemology	Integral, qualitative + quantitative, symbolic and somatic	Reductionist, behaviorist, depersonalized
Organizational Form	Open research networks, spiritual orders, ethical labs	SAPs, private contractors, secret military-industrial nodes

Table 2: Comparing White Projects and Black Projects. This diagram is reproduced from Riis-Søndergaard (2025a).

In PSI, we have already developed a prototype of a defense to the psychotronic threat, the VER-1 Prototype, which you can read more about in Riis-Søndergaard (2025c). In Riis-Søndergaard (2025d), we outline the whole R&D program for building a defense, as it stands now.

Main task of PSI is to defend the crown-chakra, but in all actuality, *all* the spiritual energies of the Aryan Order – remember, this is a psychic war, so our adversaries try to affect our collective psyche. The war is therefore an occult war, and the target of the psychotronic attacks is not only our energies, but our very psychic constitution. We will not dive into the nature and problem of evil here, which we explore in other essays, but we tell you: the occult war is for the soul of man, and is not to be taken lightly. Who could be so evil, as to attack the collective psyche of the Hyperborean Siddhas with all kinds of demonic interference, numbing our crown-chakra, and infringing upon our shared, communal loving relationships and faithfulness? It’s truly a battle against alien, vile evil. The occult war may go unnoticed by many people, but as spiritual leaders and primary targets, we have to take a stance.

Establishing the Research Institute for Spiritual Energies (RISE) and Project Spearhead Industries (PSI)

This essay/open letter is meant as an up-to-date primer on the R&D organization and activities of the AO, and as a call to our allies for support in the Great Cause. If you are interested, and we hope you are, and are willing to support the AO in our fight for freedom and justice, do take a look at our wider doctrine, and do disseminate this primer to suitable allies.

Let's now present this diagram, comparing the tasks of RISE and PSI:

Aspect	Research Institute for Spiritual Energies (RISE)	Project Spearhead Industries (PSI)
Primary Role	Theoretical research into spiritual energies, aether, and metaphysics	Applied science & engineering of devices, prototypes, and tactical systems
Core Goal	Uncover and systematize hidden laws of aether, Vril, and metaphysical order	Translate discoveries into practical defenses, technologies, and field applications
Orientation	Contemplative, investigative, hermeneutic	Pragmatic, experimental, technological
Methods	Philosophical analysis (Heidegger, esotericism, metaphysics) - Aether theory modeling - Study of chakras, aura, psychotronics - Meditation, phenomenology, symbolic hermeneutics	Device prototyping (VER-1, shielding systems, jammers) - Materials testing (crystals, metals, frequencies) - Tactical field experiments - Engineering counter-measures
Outputs	Theories of aetheric dynamics - White Papers & Essays - Doctrinal models (Aufheben, Aletheian Method)	Functional devices (shields, emitters, detectors) - Operational protocols - Defensive & offensive psychotronic strategies
Time Horizon	Long-term: uncover universal truths of aether and Spirit	Short-term to mid-term: immediate defense solutions
Relation to ADRP	Provides the conceptual models for shielding, countering, and eradication	Builds and tests systems based on RISE's models; deploys them in practice
Esoteric Dimension	Guardian of gnosis, unveiling of divine metaphysics	Guardian of praxis, embodiment of divine will through tech
Slogan	"To Know the Aether."	"To Forge the Blade."

Table 3: Outlining the tasks of RISE and PSI. This diagram is reproduced from Riis-Søndergaard (2025d).

We think this setup is applicable to our agenda of both studying and proving our spiritual energies, empirically, and to build a defense to the threat of psychotronic weaponry. The main point of this essay is to inspire our allies to really communicate about, and put a serious effort into defeating, the very real threat of those weapon-systems, which without a doubt, nowadays are being levied against the AO leadership. For how long can we go on with these severe attacks, which are ongoing 24/7 for years now, when we know of the immensity and grace of our crown-chakras, light-bodies and souls? Who among our allies will be ready to stand up and defend the AO, when we as an order are coming up from the below? The principalities of darkness, the powers-that-be, may have swayed the majority of the so-called political elite of the world, but good people will of course always be the true leaders of the people, despite massive repression and suppression on behalf of "the system". We were told that "the system is the New World Order (NWO) enforced by Tesla-towers". Is it not clear to our allies that the AO represents the true alternative to the Liberal/Marxist materialist hegemony of spiritual suppression?

Confusion, angst and near existential despair is abound in the Western world, where 80% of the population receive psychiatric, medicinal treatment during their lifetimes (Kessing et al., 2023).

At the same time, they built the Skynet to attack the true hope of a spiritual future and liberation, namely the Hyperborean Siddhas, the "Liberator Gods" (Rosario, 1985; 2022; 2023).

Future hope – Closing remarks on the prospect of the resistance

The ideas we have presented in this essay/open letter on the reality of the Aryan race, and the imminent threat of psychotronic weapons, might be new, obscure, and daring to some, but for those in-the-know, these ideas align perfectly well with the broader esoteric tradition, and with the “deeper layers of world history”, as Evola (2002) wrote about. These ideas also align perfectly well with what we know of the new advances in military tech-development, even though these advances are closely guarded by the “keepers of secrecy”. Even Trump regularly makes references to “US advanced weapons that nobody knows of, and could hardly believe exist”. Is it such a wonder that the dark forces (Black Order) would have been so obsessed with attacking what they could never become – the Siddha of the Immortal Heart?

We are fighting those who “have become like death”, as Oppenheimer said, so what could we expect, when we first awoke to transcendental reality? We know that there are US, DARPA, NATO, MI6 and Mossad “occult warfare divisions”, but they are closely guarded, as opposed to earlier on in recent history. The dark forces seem by all accounts to be hell-bent on preventing the Hyperborean awakening and gathering, but many good people, also in the system, seek to support the spiritual awakening of mankind (Riis-Søndergaard, 2025h; 2025i) – it has always been this war – war never ends. Should we deny that there is evil in the world? No, we shouldn’t. And perhaps evil is much more real and radical, than mere ignorance, weakness, failure, or incompetency.

Are there strategic forces, seeking to suppress the Hyperborean awakening, and our Masterplan? Of course, there are. Otherwise, what is the point of temporal incarnation and war?

Rather than being “moral realists” of so-called “humanist sentiments”, we are metaphysical, ontological dualists, who have sworn an oath to defeat evil in cosmos. We know this from experience.

By any standard, is it not evil to attack the light-bodies and crown-chakras of the Siddha – the very essence of the soul? Among the Russian, spiritual-political-military elite it is said that “psychotronic warfare is warfare against God”, and we have ample evidence that the current Russians do indeed support the efforts of the AO to be free from those attacks and to defend spiritual sovereignty.

We also have evidence that “layers in the MAGA-movement” do support the AO awakening.

So we *have* hope – a bright hope for the future, when we defeat the Skynet, and build the “New Ethereal Atlantis”.

So the (ethereal) resistance must continue, as you can read about in Riis-Søndergaard (2025j).

It is really a war between a metaphysical and a materialist worldview, as it has always been, for doesn’t evil seek to keep mankind enthralled in materialism, denying the transcendental essence of the soul, the “cosmic captivity of the soul by the Demiurge”, as the Gnostics believed?

We must break free from the bonds of the Matrix, the Maya, and seek to regain “remembrance of our spiritual origins”, as both Blavatsky (1889) and Rosario have stated (Riis-Søndergaard, 2025k).

But to do this properly, we need to guarantee spiritual sovereignty and independence of the soul, and our spiritual energies. How can we remember, if our psyche is caught up in a “chaotic, reverse spin”, as is the effect of the psychotronic warfare against our crown-chakra? The integrity of our crown-chakra and other spiritual energies is crucial, if we ever seek, which of course we do, spiritual enlightenment and liberation.

Let these be our closing comments on the prospect of the Hyperborean resistance. We hope all good people will align with the cause, and we look forward to the interaction. Thank you, and blessings.
